Carpenter, late book-heeper for Campbell & Schoolcraft, brokers, who left this city July 25th, having abstracted from a safety-de-posit box in the State Bank \$36,000 in Mark Downey, returned to the city on the Chesapeake and Ohio train last night, getting off the train at the elevator. His first act was to go to his home, on north Tenth street, and present himself to his wife and two little children.

Mrs. Carpenter was wholly unpre-pared to see him and fell in a swoon after he had clasped her in his arms. Day and night she had been praying for husband's return; and his unsked-for appearance seemed an almost

To her he had ever been a tender and loving husband; to the children an affectionate and considerate father. She has suffered inexpressible misery; has passed through more than the agonies of death, and, if the world cannot forgive her husband, all

who have mercy in their souls must sympathize with this poor lady. Carpenter says he has been to Winni-peg, Manitoba, but the further he went the more miserable he became. His appearance bore out fully his statement that he had suffered terrible mental anguish, and that he had not slept a night since he left the city. Observing the great desire on the part of the citizens of Richmond for pure water-indeed, the necessity of life-I take the liberty of calling your attention to what is known among en-gineers as Professor Bishof's and Sir Frederick Abel's system, which system, at spplied by W. Anderson, civil engineer for the town of Antwerp, upon the waters of the foul stream of Netke, has resulted entirely satisfactory, relieving the water of all clay and peatty matter, and also of all microbic life, whether of vegetable or animal origin. The cost is moderate, as the method is plain and simple, with no costly mahinery or hurtful chemicals, yet scientific in the application of chemistry. It is the outcome of experiments made for years by men learned in their professions-such men as the late Professors Way and Ogston, Drs. Franckland and Voelcker, Mr. Hatton and Professor Bishof, and others. This method, I think, will prove to be the true solution to the muddy waters of the James and yield your citizens pure water.

A Desperate Suicide-Arrest of a Suspicions Character.

Special telegram to the Dispatch. NORFOLK, VA., August 8 .- A man by the name of Reuben H. Parker, in the employ of the Electric-Light Company as a trimmer of lamps, committed spicide to-day at his house, on Brewer street. He came home in a beastly state of intoxication and had to be put to bed by friends, but awoke and called for a pot of rats-bane which was in the house. His wife refused, but with pistol in hand he threatened to shoot her if she did not give him what he desired. For fear he might kill her she gave him the box, from which he extracted about two spoonsful and placed in a vessel and drank it. He then went off, and returned in about an hour with a bottle labelled "laudanum," drinking nearly the whole contents. He died shortly afterwards.

To-day a colored man by the name of Thomas Blair was arrested by order of Chief-of-Police Rolland as a suspicious character. It is thought that he is an escaped convict, having been sent to the penitentiary from Grayson county for house-breaking. The Chief has telegraphed to the Superintendent of the Penitentiary for information.
